ART PROJECT

Sensory Owl

MATERIALS

Paper, black construction paper, scissors, markers or paint and paintbrush, glue, feathers, stick, cotton balls, yellow felt

DIRECTIONS

1. Draw your owl on a piece of paper and color it in however you would like.
2. Next, cut out the owl and glue it onto a piece of black construction paper.
3. Now we're going to add some sensory elements to your picture! To start, glue some feathers on the wing of your owl.
4. Next, glue a stick across the bottom of the page for the owl to stand on.
5. Cut a moon from some yellow felt and glue it in the sky. You might also choose to cut out a little felt beak for your owl.
6. And finally, stretch some cotton balls and glue them across the top to look like wispy clouds in the night sky.

WHAT'S HAPPENING?

Owls are nocturnal, which means they are awake at night and sleep during the day. They have incredible eyes that help them see when it's super dark. They also have special feathers that help them move and fly throughout the night without making a sound!

LITTLE WOODLAND ARTISTS Thank You!
